Aman Samani

Full-Stack Software Engineer | React, Next.js, Node.js
Delhi NCR, India | +91 9794182694 | amanworkinfo@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

2026 B.Tech Computer Science graduate and full-stack developer with hands-on experience building web and mobile applications using React, Next.js, TypeScript, Node.js, Express, PostgreSQL, MongoDB, Redis, and FastAPI. Built multi-tenant authorization, REST APIs, background workers, automated tests, CI/CD workflows, and AI-assisted features. Seeking an entry-level software engineer, full-stack developer, or backend developer role in Delhi NCR.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL
Frontend: React.js, Next.js, React Native (Expo), HTML5, CSS3, responsive design, Chart.js
Backend: Node.js, Express.js, FastAPI, REST APIs, Zod, background jobs, API security
Databases: PostgreSQL, MongoDB, Redis, SQLite, Prisma ORM, schema design
Testing & Security: Playwright, Vitest, NextAuth, JWT, OAuth 2.0, RBAC, Helmet, rate limiting
Tools & Deployment: Git, GitHub, Postman, Vercel, Railway, BullMQ, CI/CD

PROJECT EXPERIENCE

Full-Stack Developer – HireKarlo, AI Applicant Tracking System **Independent Project**
Next.js, TypeScript, PostgreSQL, Prisma, NextAuth

- Designed a multi-tenant data model for organizations, memberships, and invitations; enforced four-level role-based access control across server actions using NextAuth and Prisma.
- Identified and fixed two cross-tenant insecure direct object reference (IDOR) vulnerabilities, preventing recruiters from accessing data belonging to other organizations.
- Integrated Google Calendar OAuth, interview scheduling, double-booking validation, and ICS invitations; added Playwright and Vitest coverage with CI checks for linting, type safety, tests, and production builds.

Full-Stack Developer – Fitlip, Health and Nutrition Application **Independent Project**
React Native, Node.js, Express, MongoDB, Redis, BullMQ

- Developed more than 90 REST API endpoints across 10 route modules for nutrition, workouts, health tracking, authentication, and social features.
- Implemented friend challenges, streak leaderboards, achievements, and experience points, calculating challenge scores from daily activity logs and persisting final results.
- Built two BullMQ and Redis workers for weekly plan updates and engagement notifications; hardened APIs with Helmet, CORS controls, validation, and rate limiting.

Rookie Agent – Local AI Developer Companion *FastAPI, React, SQLite, Ollama*

- Built a FastAPI backend with 23 modules, a React dashboard with 10 views, and an MCP server exposing 11 tools for querying agent memory.
- Created an isolated code-execution workflow with secret-stripped subprocess environments, execution timeouts, and forced cleanup; removed secrets from clipboard content before storage.

Context Guard – LLM Context Monitor *JavaScript, Chrome Extension Manifest V3*

- Developed resilient DOM parsers for ChatGPT, Claude, and Gemini with fallback traversal and selector-health diagnostics.
- Kept provider API keys in the background worker, limited extension permissions, stored snapshots locally, and added JSON and Markdown exports.

OPEN-SOURCE CONTRIBUTION

Contributor – NotionNext, Pull Request #4471 **Merged**
React, JavaScript, Tailwind CSS, GitHub *Aug 2026*

- Improved the HEO theme's day/night toggle with semantic button behavior, ARIA attributes, keyboard focus styles, reduced-motion support, and reuse of the existing theme state and persistence logic.

EDUCATION

Babu Banarsi Das University, Lucknow **GPA: 7.6/10**
Bachelor of Technology in Computer Science *Sep 2022 – Jun 2026*

- Led a four-member capstone team; practised data structures and algorithms in Java, including dynamic programming.
